OBTAIN AN OPTIMAL SHADE-TAKING IN FEW SECONDS Parts Mapping is a medical device class I. Manufacturer: BOREA. CE mark. It is a device reserved for dental professionals and not reimbursed by the health insurance agencies. Read carefully the user manual before use.

TAKE ADVANTAGE OF A FULL DIGITAL SYSTEM

TOOTH SHADE AND TRANSLUCENCY ANALYSIS

A plug and play shade-taking device automatically calibrated during each acquisition.

Patented measuring head for an access until premolar teeth.

The calibration tips can be autoclaved.

No influences from external environment.

Determine the shade in a scientific and reliable way thanks to a constant and calibrated analysis.

SOFTWARE AND MOBILE APPLICATION

A user-friendly software for analysing and save data.

Create easily a digital order form.

A complete database with several shade guides available for an easier data analysis.

Realise automatic shade conversions.

A mobile application to complete the order form with patient pictures. (free download from online platforms)

GEOLOCATION OF LABORATORIES (Option: Rayplicker™ Service Pack)

Find labs using the solution anywhere in the world.

Send a numerical order to the laboratories (by Cloud or mail)

The lab receives all of the shade-taking information.

A community platform to easily communicate about its company.

INTERCONNECTION BETWEEN DENTAL PRACTICE AND LAB

Follow your orders in real time on the main page of the software.

Communicate easily and effectively with laboratories.
