

The choice of millions of dentists worldwide

U600

Ultrasonic Scaler

Pleasant & Efficient

Intelligent power output
Experience painless treatment

U600 Ultrasonic Scaler

A global professional scaler manufacturer focuses on technological innovation for 30 years.

International high-tech enterprise
30 years innovation
Woodpecker scaler owns **101** national patents
9 national invention patents

Effective and thorough endodontic irrigation

After irrigation, there is no smear layer on surface but a few amount of dentin debris in the root canal.

Root canal irrigation is the most widely used clinical support methods. Its purpose is to remove the substance inside root canal, dissolve diseased tissue, remove pathogenic microorganisms, and remove smear layer. Lubricate the root canal internal wall. During root canal preparation process, prevent the infectious substance from being pushed to the deep part or out of the apical foramen, reducing the risk of instrument fracture in root canal.

Compared with the traditional syringe irrigation, ultrasonic irrigation can better remove bacteria, dentin debris, and smear layer in root canal. And it can well clean special structures such as the lateral branch canal and root canal narrow area. Currently, ultrasonic irrigation is widely used in endodontic therapy in order to receive a better root canal preparation effect.

Sine wave drive

Avoid instantaneous stimulation caused by power surge, ensuring comfortable treatment.

U600 Mild power output

Rectangular power out of other brand scaler

High-quality handpiece

Aluminum shell can be autoclaved, not easy to cause cracking or deformation. Latest handpiece sealing technique enables long durability. User-friendly design brings better hand feeling.

Automatic water supply system

Easy to change water, eliminating redundant steps and increasing the working efficiency. Solutions such as hydrogen peroxide, sodium hypochlorite, and chlorhexidine can be used. Clear 50ml scale mark makes it convenient to formulate solutions.

> High configuration

Supragingival scaling

Implant maintenance

Subgingival scaling

Root canal treatment

For removal of calcification and bad fillings in root canal

For removal of calcification at root canal orifice and top 1/3 of root canal

For removal of calcification at root canal orifice and top 1/3 of root canal

Root canal retreatment

Special material (E6, E7) Thin, flexible, good conductivity to ultrasound

For removal of foreign body at bottom 1/3 of root canal

For removal of foreign body at top 1/3 of root canal

For removal of foreign body and instrument fractures (stainless steel) in root canal

For removal of temporary cement and instrument fracture (stainless steel) in root canal

Locate the root canal orifice

Diamond-coated ball head Locate root canal orifice with security, accuracy and efficiency

Cavity preparation

G30 For preparation between pits and fissures

G31 For the preparation of mesioocclusion cavity

G32 For the preparation of distal cavity

G30 For preparation between pits and fissures

G31 For the preparation of mesioocclusion cavity

G32 For the preparation of distal cavity

SB1 For preparation in occlusal surface and cervix dentis

SB2 For the preparation of mesial surface

SB3 For the preparation of distal surface
